INSTALLATION INSTRUCTION

INSETRA

FM-260605, FM-260705, FM-260807

WARNING

IMPORTANT: NEVER attempt any work without shutting off the electricity.

- Read all instructions before installing.
- System is intended for installation by a qualified electrician in accordance with the National Electrical Code and local regulations.
- Go to the main fuse box, or circuit breaker. Place the main power switch in the "OFF" position and unscrew the fuse(s) or switch "OFF" the circuit breaker switch(es) that control the power to the fixture or room that you are working on.
- Place the wall switch in the "OFF" position.
- Supply conductors (Power Wires) Connecting the fixture must be rated minimum 90°C. If uncertain, consult an electrician.

CAUTIONS

- These luminaires (fixtures) are designed to meet the latest NEC requirements and are listed in full compliance with UL 1598.
- Before attempting installation, check your local electrical code, as it sets the wiring standards for your locality.

INSTALLATION

Uses 3" junction box, 4" junction box or 3/0-4/0 electrical box.

1. Prior to installation, twist the trim off from the light engine.
2. Attach mounting screws into outlet box leaving enough of screw exposed to engage keyholes in the top of light engine (Fig.1). For 3" boxes, mount the light engine using the inner screw holes
3. Provide electrical service according to the"National Electrical Code" or your local electrical code to the outlet box. Connect supply wires to wires on fixture with wire nuts: white to white, black to black and green wire to green wire as grounding connection.
4. Select the desired Color Temperature by setting the sliding switch to the target CCT.(Fig.2）
5. Twist the trim on light engine , and lock the trim in place.
